This Month's February Meeting

Our next monthly Group meeting will be held on Friday February 28, 2025, at the Belmont Park Pavilion at the usual time of 10.00 am. Our speaker will be Mr Patrick Preece. Patrick completed his medical studies with Honours at Monash University in 2012. He is a Victorian trained urologist and fellow of the Royal Australasian College of Surgeons. Patrick developed expertise in andrology and genito-urethral reconstruction with further sub-specialty training in England. Morning tea will be provided by Boston Scientific.

Note: Please remember partners are very welcome to the meeting.

January Meeting

Paul chaired the meeting and welcomed members, newbie Terry and returning newbie David. 43 members attended.

In-the-News

- Listing of Talazoparib on PBS on 2 January 2025, drug beneficial to metastatic cancer and with BRCA gene. Known as a PARP inhibitor.
- Listing of a 177-lutetium radiopharmaceutical, on PBS from 1 July 2025. Lutetium therapy targets PSMA - an antigen highly expressed on the surface of prostate cancer cells. This is an innovative molecular therapy used to treat metastatic prostate cancer (cancer that has spread from the prostate to other parts of the body).
- Ronnie reported on a recent publication describing the TRANSFORM clinical trial, studying a 'polygenic risk score' for the early detection of prostate cancer, which is potentially more reliable than the current PSA test (although MRI scans have removed much of the uncertainty of PSA as a screening tool). This new approach is based on a saliva sample (rather than blood) and automated genomic testing for the presence of mutations in the person's DNA.

Meeting Feedback

We had a members' meeting to start off the year and caught up with what's going on in our lives at present. Also, we enjoyed a substantial morning tea to start off the year.

- Paul, had a Radical Prostatectomy (RP) in 2020 with a history of PSA going from two to nine. PSMA PET scans showed some remaining cancer and had SBRT radiation. Scans show cancer still there and was on Zoladex, but PSA kept rising so is now on Eligard.
- Geoff, had a RP in 2006 and salvage radiation 3 years later. He had some SBRT radiation at ICON and his PSA is 0. Geoff was on Zytiga, but is now on Lucrin. Zytiga had the side effect of causing heart problems, eg, raising pulse and high blood pressure, He will be reassessed in February for alternatives.
- Peter Armstead is being treated at Epworth Hospital. He has had no success with his last chemotherapy treatment, and is expected to be returning home.

Member Chat - Alan speaks with Vlad

- Born on Bonegilla army camp in 1950. Didn't speak English at primary school.
- Norlane High, Gordon – general studies, and Dip Ed.
- 3 children
- Was head of a department – specialised in arbitration/mediation.
- Became a consultant and still working with the Australian Sporting Commission.
- Sport – dragon boats (with Louis). Also kayaks.
- Interest in music, plays the piano accordion – threatened to bring it along to a meeting.

Presentation - Video

Healthy Diet - Prostate Cancer Research Institute PCRI, ([#MarkScholzMD](#) [#PCRI](#))

The main message was that lifestyle is important to controlling prostate cancer. The best diet is vegetarian, but at least a diet where red meat is limited, particularly processed meat, where preservatives are harmful. Animal fat, in particular, is bad for prostate cancer. Exercise is also crucial.

Charles - Conducting our exercise session.

Continuation of Member's Feedback

Paul went around the room and gave everyone the opportunity to speak. Some of the topics were:

- How exercise and a proper diet is beneficial
- Having rests from hormone treatment
- TURP and self-catheterising

Some people had attended the last Advanced Group meeting and witnessed a presentation by Professor Richard Wassersug's about using transdermal (patches) Estradiol (tE2) as an alternative to androgen deprivation therapy (ADT), e.g., in lieu of Zolodex, Lupron or Eligard.

Vale:

One of GPSG's stalwarts, Graham Flett, passed away on February 11.

Graham's Prostate Cancer had spread into his bones, and his condition deteriorated rapidly especially after getting Parkinson's Disease. Graham had many interests, photography, Men's Shed etc plus the REPHOS, which is a Geelong Based Group of retired Pharmacists.

We pass on our condolences to his wife Bronwyn and family.

In-the-News

Deakin University Burwood - Mental health care from dietitians, exercise physiologists equal to psychologists, study finds

The eight-week trial by Deakin's [Food & Mood Centre](#) found depressive symptoms significantly improved among adults whose treatment focussed on lifestyle changes such as diet quality and increased movement overseen by an accredited practising dietitian and exercise physiologist. The results were on

par with improvements seen among those undergoing cognitive behavioural therapy delivered by psychologists over the same period of time. For more: [Click Here](#)

From PCFA

Blue Sky News:

The January edition has just been released. Some of the topics are as follows:

- A new era in early detection. Australian experts are about to release new guidelines for the early detection of PCA, towards PCFA’s goal of zero deaths in ten years.
- PCFA and New Zealand’s ANZUP have agreed to a landmark three-year research partnership aimed at accelerating clinical trials and advancements in PCa treatment.
- Australian scientists are leading the world in creating a pipeline of nuclear medicines to treat PCa.
- Clinical trials in stereotactic body radiation therapy (SBRT) is providing hope for men with aggressive cancer, delaying the need for hormone treatment or chemotherapy for up to five years.
- Australian men are being invited to take part in a global clinical trial of the targeted nuclear medicine known as TLX591.
- Radiotherapy protection for the rectum using the SpaceOAR.
- Prostate cancer incidence around the world.

Membership Renewal

GPSG Membership Fees and donations

It’s again time to renew your financial membership of the Support Group. The new annual membership fee of \$20 is due at the commencement of the calendar year. Please provide the treasurer with your membership fee, in cash with the slip below, or by credit card, at the next meeting.

Alternatively, the payment may be made by:

- Direct bank transfer to: GPSG, BSB 633000 Account number 126830009. If using this method, please ensure to include your name in the reference block

Being a financial member places you in the ‘Active Member’ category, one of the benefits being that you have access to upcoming events and the latest news about prostate cancer.

We thank you for supporting the Group. Any member wanting to cancel his membership with the Geelong Prostate Support Group, or anyone not wanting to receive our newsletter, please advise Bill Rebula on 0414 524 155 or by email on info@geelongpsg.net
